BUILT FOR WINDSURFERS

WINDSURF FIT

Windsurf Fit shapes the suit around the windsurfing stance. Arm panels are contoured to make room for forearms that pump up under load, cutting fatigue and cramp without costing grip strength. A longer back panel frees the shoulders; a shorter chest panel means no spare material flapping.

01 EXPANDED ARMS
your arms take the main load from the rig.

02 SHOULDERS FORWARD
you hang from the boom.

03 HEAD TURNED
you look where you're going.

FRONT BACK

- **Minimal seams:** No cosmetic seams; every panel optimised for shape, material and stretch direction.
- **Neck:** Cut loose to stay comfortable with your head turned.
- **Dynamic stretch:** Shaped to fit on the water, once your forearms are pumped and your body is working hard.

Five models, all built for windsurfing.

- **Primo and Prima:** men's and women's performance suits; panels and seams cut for the stance, with arm and leg length set for each thickness.
- **Impact:** dual-density pads to soften big landings, with extra room through the chest and back.
- **Neo Top:** a warm-water top with wide-cut arms for pumped forearms.
- **Flight Suit:** a sleeveless long john for foil racing, in men's and women's versions.

PRIMO

PREMIUM PERFORMANCE

6 styles · Men's S to XL

Charcoal / Grey details

2/2 3/2 4/3 5/3 6/3

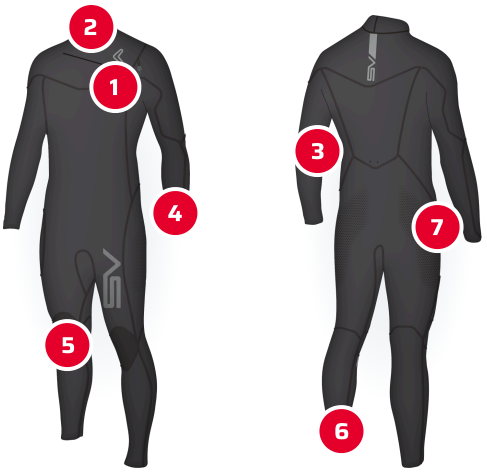

The Primo is SEVERNE's men's performance suit: stretch and warmth, shaped around the windsurfing stance. From zipless 2/2s up to a 6/3 hooded U-zip steamer. Charcoal with grey details.

SALES VALUES

- **i-Foam:** Lighter and stretchier than standard neoprene, for more freedom on the water.
- **Stretch Control:** Arm and leg length matched to the stretch of each thickness.
- **Integrated hood:** Built into the 6/3 steamer; one less thing to manage on cold days.
- **Chest entry:** Extra elastic straps removed so the back panel stretches fully.
- **Windsurf Fit:** Shaped around the windsurfing stance; less fatigue, full grip.

FEATURE MAP

FRONT BACK

1. ENTRY
Zipless on both 2/2s; a one-handed chest zip on the 3/2, 4/3 and 5/3, head low and covered so it won't rub with your head turned; a shoulder U-zip on the 6/3 hooded steamer.

2. NECK
Soft, with a fused edge.

3. ARM PANELS
Contoured to make room for pumped forearms.

4. WRIST SEALS
Silicone.

5. KNEES
Pre-bent to match the stance.

6. DRAIN HOLES
In the lower leg, so water flushes out instead of ballooning.

7. ABRASION PANELS
Dot-textured on the hips and outer thighs; they protect the suit as you move around the board.

PRIMO_ INSIDE OUT

The 6/3 hooded steamer has two linings.

- **Thermodry fleece:** Torso, legs and hood sides; quick drying, for warmth where you need it most.
- **Xtend jersey:** Shoulders, upper chest, arms, top of the hood and knee panel; high-stretch where you move most.

Front view, outside on the left and inside on the right, with Thermodry fleece on the torso and legs and Xtend jersey on the upper chest, arms and knees.

Back view, outside on the left with the U-zip entry, inside on the right with Thermodry fleece on the torso and legs and Xtend jersey on the shoulders and arms.

DETAILS

U-ZIP
Shoulder closure across the chest, below the neck.

FRONT
Hood up, U-zip line and contoured arm panels.

BACK
Hood up, smooth back panel, pull strap at the shoulder.

SIDE
Panel seams under the arm and down the torso.

NECK
Stitched seam round the neckline where the hood joins.

HOOD
Face opening, with the hood built into the suit.

LINING
2/2 inside/outside.

PRIMA

WOMEN'S PREMIUM PERFORMANCE

3 styles · Women's 6 to 12 Dark red

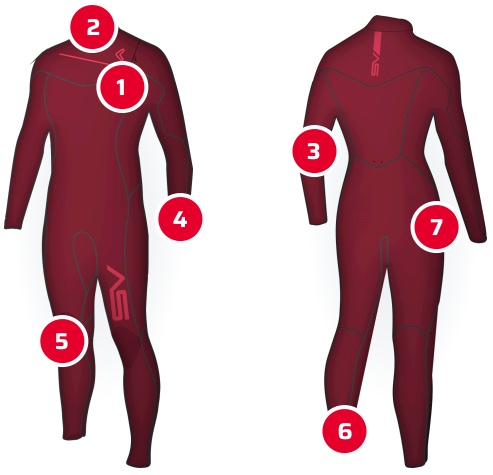

2/2 3/2 5/3

The Prima is SEVERNE's women's performance suit: stretch and warmth, shaped around the windsurfing stance. Three chest-zip styles, from a 2/2 short leg to a 5/3 steamer. Dark red.

SALES VALUES

- **i-Foam:** Lighter and stretchier than standard neoprene, for more freedom on the water.
- **Stretch Control:** Arm and leg length matched to the stretch of each thickness.
- **Chest entry:** Front entry leaves the back panel free to stretch.
- **Windsurf Fit:** Shaped around the windsurfing stance; less fatigue, full grip.

FEATURE MAP

FRONT BACK

1. CHEST ZIP
Front entry on all three styles; zip head sits low and covered so it won't rub with your head turned.

2. NECK
Soft, with a fused edge.

3. ARM PANELS
Contoured to make room for pumped forearms.

4. WRIST SEALS
Silicone.

5. KNEES
Pre-bent to match the stance.

6. DRAIN HOLES
In the lower leg, so water flushes out instead of ballooning.

7. ABRASION PANELS
Dot-textured on the hips and outer thighs; they protect the suit as you move around the board.

IMPACT

GO HARDER. LAND SOFTER.

1 style · Men's S to XL

Charcoal / Red details

3/2

The Impact started as a suit for Philip Köster to practice triple forwards in. The pads soften the blow when landing big jumps. They're dual density: a high-density PU foam outer over 10 mm of softer foam. Each pad is placed individually, so the suit still stretches normally and the pads stay clear of your harness and stance. A short-sleeve 3/2 steamer in charcoal, with red details.

SALES VALUES

- **Dual-density pads:** Firm outer layer spreads the hit; soft core absorbs it.
- **Room to move:** A wider chest and back, so the suit doesn't feel tight over the pads.
- **Stretch Control:** Arm and leg length matched to the stretch of the 3/2.
- **Extended crotch pad:** Reaches further back for more coverage on landings.
- **Chest entry:** Front entry leaves the back panel free to stretch.
- **Windsurf Fit:** Shaped around the windsurfing stance; less fatigue, full grip.

FEATURE MAP

FRONT BACK

1. CHEST ZIP
Front entry.

2. NECK
Soft, with a fused edge.

3. CROTCH PAD
Extended for more coverage.

4. CHEST AND BACK PANELS
Cut with extra room over the pads.

5. KNEES
Pre-bent, with a smaller knee shape for protection.

6. DRAIN HOLES
In the lower leg, so water flushes out instead of ballooning.

7. ABRASION PANELS
Dot-textured on the hips and outer thighs; they protect the suit as you move around the board.

DETAILS

/ **Pad layout:** Pads across the back, the shoulder and the crotch; each placed to protect without restricting stretch.

FRONT
Diagonal chest zip to the shoulder; IMPACT logo on the sleeve.

CHEST ZIP
Red zip pull, woven tab and red stud closure.

BACK
Pads across the back and shoulders; red SV logo up top.

ABRASION PANEL
Dot-textured panel on the hip and outer thigh.

NEO TOP

BRING ON SUMMER

1 style · Men's S to XL

Dark red

2/1

For the warm days. The Neo Top is a long-sleeve neoprene top for warm-water windsurfing: 2 mm body panels for warmth, 1 mm arms for freedom.

SALES VALUES

- **Perforated foam:** Softer, more flexible, and lets air through to keep you cool.
- **Boardshort connection:** The top's own material grips your boardshorts, so it won't ride up.
- **Windsurf Fit:** Shaped around the windsurfing stance; less fatigue, full grip.
- **Wide-cut arms:** Extra room for forearms that pump up under load.
- **Stretch Control:** Arm length matched to the stretch of the 1 mm neoprene.

FEATURE MAP

FRONT BACK

1. NECK
Soft, with a fused edge.

2. ARMS
Wide cut for pumped forearms.

3. BODY PANELS
Perforated foam for softness and airflow.

4. BOARDSHORT CONNECTION
Locks onto your boardshorts and stays put.

FLIGHT SUIT

FOIL RACE PERFORMANCE

2 styles · Men's and women's

Charcoal (men's) / Dark red (women's)

3/2

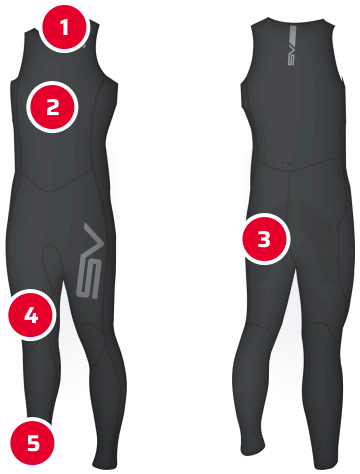

Arms free. Eyes on the mark. Pump. Most sailing long johns are cut for sitting on the side of a dinghy. The Flight Suit is cut for windsurfing: a sleeveless, zipless 3/2 long john built for racing, and foil racing above all. Men's in charcoal; women's in dark red.

SALES VALUES

- **Built for windsurfing:** Cut for the windsurfing stance, not for hiking off a boat.
- **Zipless:** No zip and no shoulder Velcro to rub or snag; the neoprene flexes enough to pull straight on through the neck.
- **Sleeveless cut:** Nothing on your arms; full freedom to pump.
- **Abrasion panels:** Dot-textured on the seat and back of the thighs; they protect the suit where it meets the board.

FEATURE MAP

1. NECK
Lycra binding that flexes open for zipless entry; wider opening on the women's version.

2. CHEST
Sleeveless cut, with Lycra-bound armholes.

3. SEAT
Abrasion panels, set close to the side seam.

4. KNEES
Pre-bent, with knee pads.

5. ANKLE
Raw edge; silicone cuff inside on the women's version.

TECHNOLOGY

I-FOAM

Lighter and stretchier than standard neoprene, for more freedom on the water.

GBS

Glued and blind-stitched seams that limit water entry.

Primo 2/2, 3/2, 4/3 / Prima 2/2, 3/2 / Impact / Flight Suit

S-SEAL

GBS seams finished with a high-stretch liquid sealant for durability and waterproofing.

Primo 5/3, 6/3 / Prima 5/3

FLAT LOCK SEAMS

Flat-stitched seams that stay soft and flexible against the skin.

Neo Top

STRETCH CONTROL

Arm and leg length set per thickness to match its stretch.

FUSED EDGE

A tapered finish on the neck panel; no hard edge to rub with your head turned.

SILICONE SEALS

Wrist and ankle seals that limit ride-up and flushing.

DRAIN HOLES

Release water from the lower leg to stop ballooning.

PRE-BENT KNEES

Shaped to the windsurfing stance to reduce muscle fatigue.

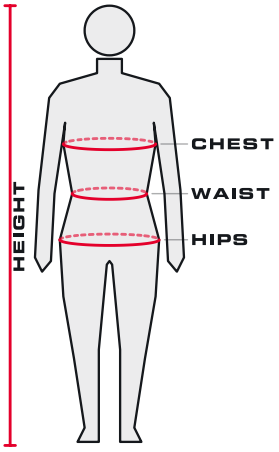

ABRASION PANELS

Dot-textured panels that protect the suit as you move around the board.

Hips and outer thighs: Primo, Prima, Impact / Seat and back of thighs: Flight Suit

SIZE CHARTS

Primo, Impact and Neo Top come in S to XL. Prima comes in 6 to 12. Flight Suit comes in S to XL for both men and women.
